BIOGRAPHICAL INFORMATION	<i>Date of Birth:</i> 26 January 1980	<i>Citizenship:</i> British
RESEARCH INTERESTS	Theoretical cosmology, reionization, cosmological 21 cm line, large scale structure, cosmic microwave background, inflation, dark energy, neutrino mass	
RESEARCH EXPERIENCE	<p>Imperial College, London, UK <i>Lecturer in Astrostatistics</i> October, 2011 - Present Research in cosmology, the epoch of reionization, and astrostatistics.</p> <p>Harvard-Smithsonian Center for Astrophysics, Cambridge, Massachusetts, USA <i>Hubble-ITC Fellow</i> September, 2007 - August 2011 Post-doctoral research in cosmology, the epoch of reionization, and the theory of the 21 cm line.</p> <p>California Institute of Technology, Pasadena, California, USA <i>Graduate Student</i> September, 2002 - June 2007 Ph.D. research in cosmology, CMB B-modes, and the early Universe.</p> <p>Cambridge University, Cambridge, UK <i>Part III Research project</i> December, 2001 - August, 2002 Master's level research into bound fermionic states around black holes, using a gauge theory of gravity. Advisor: Anthony Lasenby.</p> <p>California Institute of Technology, Pasadena, California, USA <i>Summer Undergraduate Research Fellowship</i> July, 2001 - September, 2001 Undergraduate level research into quintessence models for dark energy. Advisor: Marc Kamionkowski.</p>	
EDUCATION	<p>California Institute of Technology, Pasadena, California, USA Ph.D., Physics, June 2007.</p> <ul style="list-style-type: none"> • Advisor: Marc Kamionkowski • Thesis: Extracting the cosmic history from diffuse backgrounds <p>Cambridge University, Pembroke College, Cambridge, Cambridgeshire, UK M.A. (Cantab), Natural Sciences, March, 2004. M.Sci., Natural Sciences, June, 2002. B.A., Natural Sciences, June, 2002.</p>	
HONORS AND AWARDS		

Marie Curie Career Integration Grant, 2012 - Imperial College London
Hubble Fellowship, 2007 - Harvard College Observatory.
Cambridge University, graduated with double First in Physics, 2002.
Foundress Prize, Pembroke College, Cambridge University, 2001.
Foundation scholar, Pembroke College, Cambridge University, 2000.
College scholar, Pembroke College, Cambridge University, 1999.

MENTORING

Catherine Watkinson, PhD candidate, Imperial, 2011-present
Urbano Franca, PhD candidate, Valencia/Harvard, 2009-present.

TEACHING
EXPERIENCE

Imperial College London, UK.

Lecturer: Cosmology MSci course Spring term 2013
Academic tutor: First year undergraduate physics. Oct 2011-Jul 2012
Guest lecturer: Cosmology MSci course Spring term 2012
MSc project supervisor: Jasmina Music, Jared Phau. Imperial MSc candidates 2011-2012

Harvard-Smithsonian Center for Astrophysics, Cambridge, Massachusetts, USA

Guest lecturer
Ay 202a. Galaxies and dynamics. “Gravitational lensing” Fall term 2009

California Institute of Technology, Pasadena, California, USA

Teaching Assistant **October, 2002 - March, 2005**
Duties included small group teaching, leading problem sessions, office hours, and grading.

Ph 125. Quantum Mechanics. Fall and Spring term 2005
Ph 236. General Relativity. Winter term 2004
Ph 125. Quantum Mechanics. Fall term 2004
Ph 5, 6, and 7. Sophomore Physics Lab. Fall, Winter and Spring terms 2003-4
Ph 6, and 7. Sophomore Physics Lab. Winter and Spring terms 2002-3
Ph 3. Freshman Physics Lab. Fall term 2002

OBSERVING
EXPERIENCE

Submillimetre Array (SMA) - five nights. Oct 2010.

RESEARCH GRANTS

Imperial College Space Physics and Astrophysics STFC Consolidated grant (Co-I/GBP ~4M,16 Co-Is, 2013-2016)

“Detecting patchy reionization and the first galaxies using the 21 cm and Lyman alpha lines (21A-alpha)”, FP7 Marie Curie Career Integration Grant (PI/EUR 100k, 0 Co-Is, 2012-2016)

“Optimal Statistics for Redshifted 21 cm Observations of the Reionization Epoch”, NSF-AST (collaborator / US\$ 341,224, 2 PIs, 2011-2014)

“Probing the end of the dark ages and the epoch of reionization with the 21 cm line”, Hubble Fellowship. HST-HF-01211.01-A, NASA/STScI (PI / US\$ 320,487, 0 Co-Is, 2007-2010)

PARTICIPATION IN
PROJECTS

Square Kilometer Array (SKA) - Science Working Group (2011-present)

Dark Ages Radio Explorer (DARE) PI: J. Burns - Co-I and Science Working Group (2010-present)

Lunar University Network for Astrophysics Research (LUNAR) - Collaborator (2009-present)

Cosmic Inflation Probe (CIP) PI: G. Melnick - Science Working Group (2008-2010)

PROFESSIONAL
ACTIVITIES

SOC “The Epoch of Reionization” Apr 2012. Strasbourg, France.

PhD opponent - Martina Friedrich (Advisor: G. Mellema), Stockholm University. March 2012.

SOC “LUNAR Workshop: Robotic science from the Moon” Oct 2010, Boulder, CO.

CfA-ITC postdoctoral fellowship selection committee 2009

Co-organiser of CfA-ITC seminar series 2008-9

Member: RAS (2012-present), AAS (2006-present), IOP (2012-present), APS (2010-2011)

Referee: Physics Review D, Physics Review Letters, Astrophysics Journal, Monthly Notices of the Royal Astronomical Society, Physics Letters B, Astronomy and Astrophysics, Journal of Cosmology and Astroparticle Physics, The Harvard Undergraduate Research Journal, Classical and Quantum Gravity.

Reviewer: France-ANR, Canada-NSERC, GMRT-TAC, RAS Penston prize, Royal Society URF, NSF-AAG, STFC-Rutherford, RAS fellowship.

PUBLIC OUTREACH Science consultant: “Instant Egghead Guide: the Universe” by JR Minkel.

Science week: Cambridge Explore’s the Universe: Ask an Astronomer 2009, 2010

INVITED
CONFERENCE
PRESENTATIONS

“The Universe through the 21 cm line”. 5 lecture series for the 6th TRR33 Winter school on Cosmology. Passo del Tonale, Italy. Dec, 2012.

“Mapping the Epoch of Reionization”. Oxford Intensity Mapping Workshop. Oxford, Nov 2012.

“21 cm Cosmology”. AIU2010 - Axion Cosmophysics. KEK, Japan, Nov 2012.

“Recent developments in EoR science and the DRM”. PrepSKA WP2. Manchester, Oct 2011.

“Prospects for future 21 cm arrays”. PPC2011. CERN, Geneva, Jun 2011.

“Constraining the epoch of reionization and the dawn of structure with atomic and molecular lines”. Hydrogen Cosmology. ITAMP, Cambridge, MA, May 2011.

“Constraining the dawn of structure with the 21 cm line. AAS 217 HERA special session. Seattle, Jan 2011.

“HI Science through cosmic time”. AAVP2010: Realising the Aperture Array Programme for SKA. Cavendish, Cambridge, UK, Dec 2010.

“Lessons from constraining the global 21 cm spectrum in the presence of foregrounds”. The First Billion Years. Keck Institute of Space Studies, Pasadena CA, Aug 2010.

“Pre-reionization 21 cm signatures”. Astrophysics and Cosmology with the 21 cm background, Aspen, June 2010.

“Atomic physics and the 21 cm line”. DAMOP2010, Houston TX, May 2010.

“Paths to astrophysics with SKA”. SKA2010, Manchester, UK, March 2010. Invited plenary talk.

“21 cm signal throughout cosmic history”. Sackler conference on 21 cm cosmology, Cambridge MA, May 2008.

“Atomic physics and the cosmological 21 cm signal”. Atomic and Molecular Physics of the Early Universe, ITAMP, Cambridge MA, March 2008.

CONTRIBUTED
CONFERENCE
PRESENTATIONS

“CO intensity mapping of the epoch of reionization. EAWSS 2012, Rome. Jul 2012.

“Observational and theoretical constraints on reionization”. Reionization and Dark Ages with SKA workshop, Stockholm. Jan 2012.

“Extracting the astrophysics of the first sources from the 21 cm global signal”. New Horizons for High Redshifts, Cambridge, UK. Jul 2011.

“The global 21 cm signal”. Robotic science from the moon, Boulder, CO. Oct 2010.

“Extracting science from the global 21 cm signal”. Astrophysics and Cosmology with the 21 cm background, Aspen. June 2010.

“Constraining reionization using 21 cm experiments in combination with CMB and Lyman alpha forest data”. The High Redshift Universe. Aspen. Jan 2010.

“Constraining reionization using 21 cm experiments in combination with CMB and Lyman alpha forest data”. Reionization with Multi-frequency datasets. Stockholm, Sweden. August 2009.

“21 cm cosmology”. Fingerprints of Inflation. Aspen. June, 2009.

“Lyman series photons and the 21 cm signal”. Reionization@Ringberg. Ringberg Castle, Germany. March 2009.

“Cosmology from high redshift 21 cm observations”. Foundations of modern cosmology. GGI, Florence Italy. January, 2009.

“Neutrino mass from cosmological 21 cm observations”. Neutrino Oscillation Workshop 2008, Otranto Italy, September 2008.

“Probing the First Sources with the Redshifted 21 cm Line”. 209th Meeting of the American Astronomical Society. Seattle, January, 2007.

“Radiation fields from the first stars and the redshifted 21 cm line”. Radiation Backgrounds from the First Stars, Galaxies and Black Holes. Maryland, October, 2006.

“Radiation fields from the first stars and the redshifted 21 cm line”. The first stars and evolution of the early Universe. INT Seattle, August, 2006.

“Descending from on high: Lyman series cascades and spin-kinetic temperature coupling in the 21 cm line”. Reionizing the Universe 2005. Groningen, Netherlands, July 2005.

“Tensor modes and the cosmic microwave background” (poster). 2nd Advanced Chilean Winter School. Santiago, Chile, November 2004.

SEMINAR
PRESENTATIONS

2012: Aachen, APC-Paris, Copenhagen-NBI, Durham, Edinburgh, Portsmouth, Sussex, UCL.

2011: Brown, Cambridge - IoA, CCAPP-OSU, Imperial, ITAMP-CfA, Leiden, Perimeter, Princeton, Waterloo.

2010: Berkeley, Cambridge - Kavli, Carnegie Mellon, CITA, Chicago, Oxford, Yale.

2009: CfA. 2008: UT Austin. 2006: KIPAC, Berkeley, Columbia ISCAP, Harvard ITC.

COMPUTER SKILLS

- Languages: C, C++, Fortran 77 & 90, HTML, IDL, Perl, Python.
- Cosmology: CMBFAST, CAMB, COSMOMC, HEALPIX.
